

Configured: 99 and 999

Ping success: no trunking isn't active.

Result negotiation: trunk link

Result: changed state up, down, up then vlan 99 to up

G0/1: mode: auto status: trunking

Native vlan: 1

Message received: %SPANTREE-2-BLOCK_PVID_LOCAL: Blocking GigabitEthernet0/1 on VLAN0999. Inconsistent local vlan. To correct you configure native vlans on the other switches.

Mode before change: I couldn't see anything

After change: mode: on encapsulation: 802.1q

Negotiation of trunking: off
