

Hostname: Router

fastEthernet: 4

Gigabit: 2

Serial: 2

Vty: 0 4

Startup config: nothing has been saved so nothing shows up

Configuration: show running-config

Why MOTD: Security reasons

Enable not valid: Its no longer valid because it is superseded by the secret password Since service password-encryption is not active they are in plain text.

NVRAM: copy run start is the command that is the shortest and what I used.

Flash: 3 files. c1900-universalk9-mz.SPA.151-4.M4.bin, its the biggest.
